Winter Haven - First Class Fun

Our GSP's are also a big part of our family.

When the Winter family arrived in the United States from Germany, they brought a pair of GSP's with them. Since that first pair, they've been breeding and hunting with GSP's for generations. Lee started out hunting and then guiding on his family farm in western New York with the family GSPs. Later, he worked at a few preserves in northern Virginia always dreaming of having his own place. Those dreams came true when he purchased his own land to start what has become a first class hunting preserve for pheasant, chukar and quail. Now "retired," he's able to concentrate on his love of

hunting with his GSP's and share this passion with everyone he guides.

Winter Haven Game Farm & Preserve is located in Palmyra, Virginia which is about 20 miles east of Charlottesville. We have been operating for 15 years. Lee has 6 Shorthairs currently - Heidi is 14 and still loves to hunt; Ida is 11 and loves to hunt quail; Fern is 8 and a dynamo in the field; Blaze is 3 and holds his own with the others; and then there are Mickey Jr and Saddle who are both 1 and progressing in their training toward being top notch hunters.

"At Winter Haven Game

Farm & Preserve, we do guided hunts, as well as encourage our clients to hunt with their own dogs." Lee also helps clients train their own dogs for hunting. "Our GSP's are also a big part of our family and we love them all."

Winter Haven Game Farm & Preserve is located in Palmyra, Virginia which is about 20 miles east of Charlottesville. They've been in business for 15 years and would be happy to be your hosts! Check out their web site at www.winterhavenpreserve.com or give them a call at: either 434-589-6977 or 703-725-7926. And tell them you heard about them in the GSP Chronicle!
